

How LDR helps with **HOARDING**

BRING BACK THE SHINE

Let us help with disposal, clean-up, and repair associated with hoarding. Our certified technicians can help take any location back to a clean and comfortable state.

Disposal

The first step to getting things back to normal is disposing of the refuse. Our experts will come in and remove the debris to allow for the next important steps.

Cleaning

Once the debris has been removed, we'll thoroughly clean the space with green cleaning products. The space will be ready for people and pets!

Repair/Replace

Once the area has had the refuse removed and is cleaned, we can

fully repair or replace the structure to bring it full circle. Our carpenters are able to do the job needed to return that shine.

Select Your Needs

We are also able to work on select portions of a project. If you need one of these areas handled, we can come in for just that purpose.
