

How LDR helps with **WATER DAMAGE**

NAVIGATING UNCHARTED WATERS

Water damage is among the most common problems you could face as a homeowner. It can originate from a leaking appliance, burst pipe, or sudden storm. Events usually occur suddenly and without warning. These events can cause widespread, expensive, and lasting damage. Further, if not handled properly they can lead to hazardous mold in the future. Let us help you take control of your situation and put things back to right!

The Process

Once on the scene we will evaluate the severity of the damage and determine the steps needed for mitigation. Upon approval, we will begin the drying process. Once the affected area is dry, we will work with you and your insurance provider to develop a scope of work to restore your property. We'll help you navigate the uncharted waters of making an insurance claim as well. Our project managers will work directly with your insurance provider to streamline the process and

get you back in your home or business as quickly as possible.

Certified Technicians

Our technicians are all fully certified by the IICRC (Institute of Inspection Cleaning and Restoration Certification). They have a full understanding of the science behind water mitigation and will quickly begin the process of drying out the affected area to prevent further damage.
